Attention deficit hyperactivity disorder (ADHD) in ...

Attention deficit hyperactivity disorder (ADHD) is a chronic condition that affects millions of children and often continues into adulthood. ADHD includes a combination of persistent problems, such as difficulty sustaining attention, hyperactivity and impulsive behavior.

Attention Deficit Disorder Without Hyperactivity

ADD may also involve hyperactivity with behavior problems. In addition, students with ADD may have learning disabilities and are often at risk for repeated disciplinary problems in schools. In fact, adults and peers alike may conclude that such students are lazy because of their inattention to tasks and failure to follow through with assignments. While ADD is extremely common, misperceptions about the disorder continue to circulate.

Attention deficit hyperactivity disorder (ADHD) Symptoms ...

The symptoms of attention deficit hyperactivity disorder (ADHD) can be categorised into 2 types of behavioural problems: inattentiveness, and hyperactivity and impulsiveness. Most people with ADHD have problems that fall into both these categories, but this is not always the case.
