11 Plus: Key Stage 2 Maths: Algebra Balancing Equations ...

The key thing to understand is that an equation has to balance each side of the equals sign must have the same value for it to balance. They can relate to having a heavier person on the other end of the seesaw and being stuck up high in the air. Think about an adult on one end and maybe adding friends to their end to balance the seesaw. If their combined weight equals that of the adult then the seesaw would be balanced. Too many children and the adult would left high in the air.
