puter Vision and Learning Approaches to Medical Imaging

puter Vision and Learning Approaches to Medical Imaging Dave Tahmoush and Hanan Samet Abstract A technique that radiologists use to diagnose breast cancer

puter vision

One of the most prominent application fields is medical computer vision, or medical image processing, characterized by the extraction of information from image data to diagnose a patient. An example of this is detection of tumours, arteriosclerosis or other malign changes; measurements of organ dimensions, blood flow, etc. are another example.
