Multiple Loop Design Technique for High Performance Low ...

Abstract: A new multiple loop design technique for high performance low dropout (LDO) regulator designs has been proposed and successfully implemented in many commercial products for portable smart phone and tablet PC applications.

Design for High Performance, Low Power, and Reliable 3D ...

This book describes the design of through silicon via (TSV) based three dimensional integrated circuits. It includes details of numerous “manufacturing ready” GDSII level layouts of TSV based 3D ICs, developed with tools covered in the book.

A Reference Design for High Performance, Low Cost Weigh ...

The trend in weigh scales towards higher accuracy and lower cost has produced an increased demand for high performance analog signal processing at low cost. The scope of this requirement is not obvious; most weigh scales output the final weight value at a resolution of 1:3,000 or 1:10,000, which is
