Solving unit rate problem (video) | Khan Academy

Jayda takes 3 hours to deliver 189 newspapers on her paper route. What is the rate per hour at which she delivers the newspaper? So this first sentence tells us that she delivers, or she takes, 3 hours to deliver 189 newspapers. So you have 3 hours for every 189 newspapers. That's what the first

How to Calculate Unit Rate wikiHow

How to Calculate Unit Rate. "Unit rate" is a comparison of any two separate but related measurements when the second of these measurements is reduced to a value of one. Calculating the unit rate in any set of circumstances will require the...

Unit Rate Math Help

For example, if there are 70 students in 5 classes, find the number of students per class. To find the unit rate, divide the numerator and denominator of the given rate by the denominator of the given rate. So in this case, divide the numerator and denominator of $\frac{70}{5}$ by 5, to get $\frac{14}{1}$, or 14 students per class, which is the unit rate.
