How to generate a list of all possible 4 digits ...

How to generate a list of all possible 4 digits combinations in Excel? In some cases, we may need to generate a list of all possible 4 digits combinations of number 0 to 9, which means to generate a list of 0000, 0001, 0002...9999.

A list of all four digit codes for a cell phone from 0 to 9?

There would be 10,000 numbers. If you know which one is "9" that leaves 1,000. If you're not sure which one is "9" you have 2,000. I hope you're not trying to figure out someone's PIN.

PIN number analysis DataGenetics

The chart on the right shows the relative frequency of the first digit of 4 digit pin codes. As you can see, the digit 1 dominates (and it's not all down to the 19XX phenomenon.) Little bright specs dot the plot in places corresponding to numerical runs (both ascending and descending) such as 2345 , 4321 and 5678 .
