the man made disasters account was some 5–10 years in advance of, and provided much of the conceptual foundation for, other 1980s work that has contributed to our

Man made disasters: why technology and organizations ...

The man made disasters model proposes that the build up of latent errors and events, at odds with the culturally taken for granted, is accompanied by a collective failure of organizational cognition and ‘intelligence’, as the developing system vulnerability to failure remains concealed by social processes which attenuate evaluations of risk (Freudenberg, 1988, Pidgeon, 1994, Vaughan, 1996).
